Dear Clarinus Village House Committee,

It has always been an objective in my life to help people better their lives. I believe physical health is the cornerstone of a productive academic career at university. Hence, I would like to express my interest in the Sports Representative position.

Physical health can influence one's outlook on life. From my three-year experience of representing my tennis team during high school it is evident that sports affect one's emotional, psychological, and social well-being. The more activities one is involved in the better the chances of them gaining a support group from their team members.

I believe that in order to be a productive and active member of any society you need to be physically active. I encourage all students from different interests and backgrounds to participate in sports. My role as Vice-captain for my high-school swimming team revealed that one way or another every student will benefit in some sort of way from a sport. As a sports representative I will ensure that sports are an inclusive phenomenon in our residence.

I'd be suitable for this portfolio not only for my passion towards sports but because I work efficiently with other people; punctual with deadlines and lastly my communication with students is easy as my persona appears friendly.

As the Sports Representative I would like to continue the Wednesday evening aerobics session that is available for all Clarinus students. So that students, who do not want to participate in the mainstream sport teams of Clarinus Village, can still be physically active.

I aim to make the Clarinus sports teams flourish and thrive this year. I look forward to working with the committee in achieving this and learning from this experience.

Thank you for considering my application.

Yours sincerely,  
Nompumelelo Msiza
